

QUICK, EASY ACCESS REDUCES DELIVERY TIMES

THE PACE EDWARDS VERTICAL DOOR SYSTEM

An alternative for fleet managers, commercial truck upfitters and truck body manufacturers

An efficient, versatile option for all delivery and service vehicles, the Pace Edwards electric Vertical Door System offer advantages over traditional hinged and pocket doors. Designed with interlocking, retractable aluminum extrusion technology, these doors enhance safety for drivers and operate more efficiently, helping you improve delivery times.

FEATURES

- Interlocking aluminum panels
- Powerful, reliable motorized operation with manual override
- Available for 12V and 24V electrical systems
- 3-way control: At the door, in the cab, by remote keyfob
- High-speed operation: Fully open or closed in seconds
- Electromechanical brake
- Retracts into a compact, self-contained overhead canister
- Easy-access service panel
- Custom sizes: fits a wide range of applications
- Bump stop protects personnel and cargo
- Rain management drip rail
- Door-open alarm

ADVANTAGES

- Vertical door is unaffected by gusts of wind and does not swing into traffic
- Safer access – no door blocking movement or line of sight
- Better for confined spaces
- Frees hands for delivery tasks
- Lightweight aluminum reduces weight and saves fuel
- Electric operation reduces driver strain and use injuries

Service body and pick up applications are also available.
